**WEATHER HIGHLIGHT**

Low pressure and a moderately strong cold front cross the Geographic Area today bringing rain, showers, and embedded wet thunderstorms. Stronger winds for southeastern Oregon accompany the cold front Wednesday afternoon, however, humidity will be on the increase. Thunderstorm outflow winds over southeast Oregon could become strong to severe. Another upper low arrives this weekend to reinforce the cooler temperatures but will not bring significant rain for many areas. Another upper low Tuesday brings a better chance of beneficial rain.
