**WEATHER HIGHLIGHT**

Showers and wet thunderstorms become more focused over eastern Oregon and far southeast Washington today, then will continue overnight. Gusty north winds develop over portions of eastern Washington and north-central Oregon, driest in Washington. Another upper trough moves over the region Tuesday for additional rain across western PSAs and showers east. High pressure builds offshore Wednesday and heading into the weekend. However, how this upper ridge evolves remains rather uncertain for this weekend and early next week.
