WEATHER HIGHLIGHT

Very warm and dry today as high pressure and a thermal trough bring a warm start to the morning. Wednesday, low pressure crosses the Geographic Area. A marine push brings moderately strong winds through the Cascade gaps and across the Columbia Basin. Drier southwest general winds also strengthen across south-central and southeast Oregon. Rain with isolated thunderstorms mainly over western Washington. Little rain falls east of the crest though isolated thunderstorms are also possible. Mild weather under westerly flow returns heading into the weekend. Another drier system crosses Saturday night and Sunday.
